POLL MERINO RAM SALE

15TH OCTOBER 2026 | 2.00pm

303 West Road, MacGillivray, Kangaroo Island SA

June / July 2025 Drop

Shorn 15th April 2026 | Last Weighed 24th August | Sheep Genetics Reported 7th October 2026

WELCOME TO DEEP DENE POLL

The Deep Dene Team welcomes you to our 2026 Ram Sale catalogue.
We're proud to present our 48 rams for auction at our On-Property Ram Sale on the 15th of October 2026.

This year has seen a different version of farming for us; changing generational hands, seasonal break on time, rising wool prices and full dams. A remarkable time to be farming.

With this in mind, we'd like to take you through our story here at Deep Dene.

We're a family owned and operated farm on Kangaroo Island, breeding rams that are tested and run under commercial conditions. This means that our figures are highly relevant to commercial producers.

Our Legacy started in 1967 with Harry and Dawn Berry producing high cutting merinos with good lambs. This legacy is backed by 30 years of benchmark data from our Parents Lloyd and Christine Berry of their commercial enterprise, with figures showing we produce 35+kg/ha CFW annually year in year out.

Our rams are phenotypically classed on body and wool traits to ensure they are sound and will produce progeny with good structure and wool that doesn't leave sheep that breakdown or your wool lines full of dermo and colour.

We don't foot trim our rams to hide faults. Instead, we select for correct feet and legs so that soundness is built into the sheep, not presented just for sale day.

From there, we concentrate on production per hectare traits that put dollars in ours, and your, back pocket.

This means we put significant selection pressure on traits like CFW, FD, CV, higher weaning weight without blowing out adult weight. We aim to keep SL positive, SS high, ERA and NLW traits high and have invested in measuring our EMD and Fat traits with great success for our 2025 drop rams.

We DNA all our sheep for correct pedigree, improved accuracies on our measured ASBV traits and collecting data on hard to collect carcase traits.

We love what we do here at Deep Dene and my brother Nick and I look forward to you walking this journey with us as we strive for optimised production per hectare in Wool, Meat and Lambs.

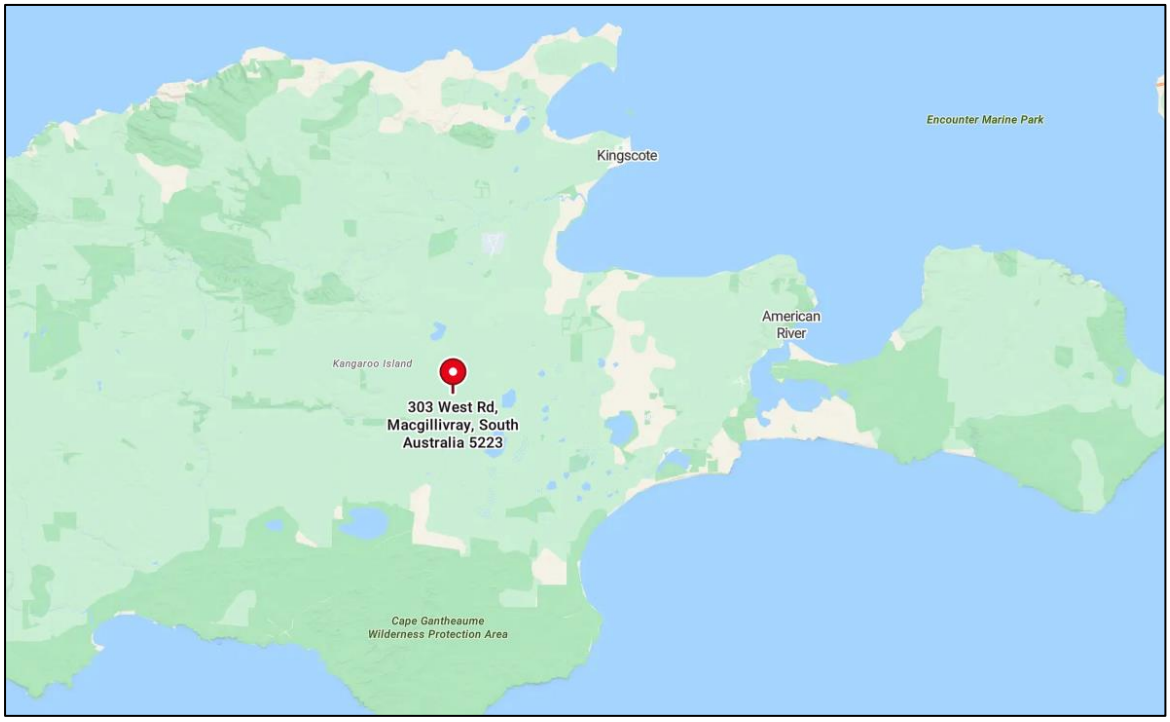

Cheers,

Caitlin Berry, Stud Principal

SALE DAY AT DEEP DENE

Sale Date | 15th October 2026 **Inspection 12pm** **Sale Time | 2pm**

Location | 303 West Rd MacGillivray, Kangaroo Island SA 5223

Agent: Nutrien Ag Solutions – Kingscote Branch:

- **Sabrina Andrews 0428 920 834**
- **Paul Bott 0418 358 370**
-

3% Outside Agents when notified 24hrs before sale

Phone Bidding Accepted and can be organised with stock agents through Nutrien Ag (as above), AWN (Tom Simmons and Matt Foster) and Elders (Marty Kay).

Logistics: Rams purchased on the day can be loaded into your stock crate post sale. Delivery of ram teams can be arranged

DEEP DENE RAMS HAVE BEEN

- Vaccinated with Glanvac 3 in 1
- Vaccinated with Gudair – Ovine Johne's Approved Vaccinated Flock since 2001
- Vaccinated with Scabby Mouth
- Selenium and Cobalt Bulleted
- Brucellosis Accredited (826)
- Non-Mulesed
- Drenched with Cooper's Flexolt - treated to label recommendations
- Drenched with Abatak™ LV and Combitak™ also with a Sheepguard Long Acting – will require exit drench on arrival to your property (Vet recommends Elanco Zolvix Plus or Zoetis Startect)
- TSU – Genomic 50K

DEEP DENE HAVE MEASURED THESE TRAITS

- Fleece Traits (micron, GFW, Yield, CV, Comfort, Spinning Fineness, Curvature, Fibres >30%, SD)
- Muscle and Fat scanned
- Body Weights W, PW, Y – no recent weight for biosecurity reasons
- Individual WECs
- Dag, Colour, Character, Leg, Back, Foot, Shoulder, Body Size and Fleece Rot
- Pedigree

MERINOSELECT indexes

A ram buyer's guide

Indexes help you select animals for use within a breeding program when there are many traits of importance. Using indexes in your ram purchasing decisions allows you to make balanced genetic progress towards more profitable sheep for your production system. A ram with a higher index will produce progeny that are more profitable in that production system.

Choosing the right index

MERINOSELECT provides four standard indexes covering a broad range of production systems, from wool-focused indexes for producers aiming to go finer while increasing wool production (Fine Wool), or with greater emphasis on wool cut (Wool Production) through to systems deriving more balanced income from wool and sheep sales where a focus on sustainability traits is important (Sustainable Merino), and prime lamb production from Merino ewes (Merino Lamb).

The following flowchart helps producers determine the best index for their Merino production system:

How to use the chosen index to assist in purchasing decisions:

Before the sale:

1. Rank animals in the sale on the value of your chosen index.
2. Consider the individual ASBVs which are important to you to create a short list of rams to look at on sale day.

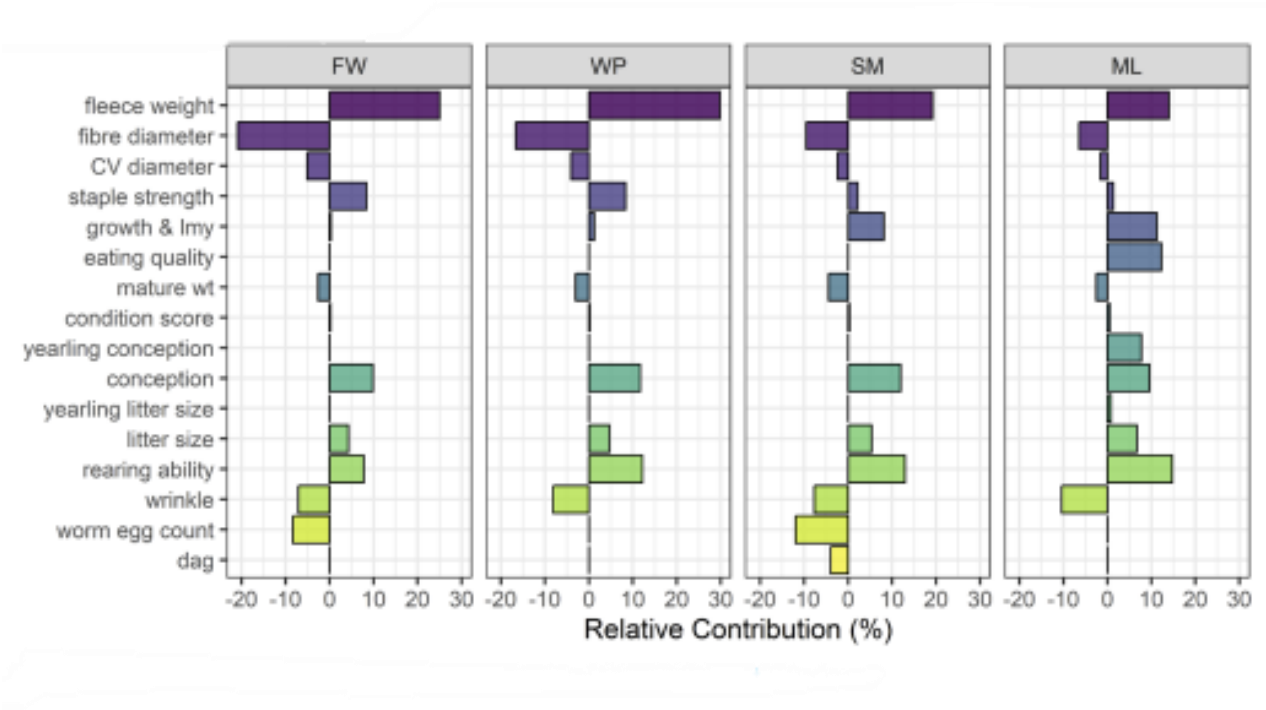

At the sale:

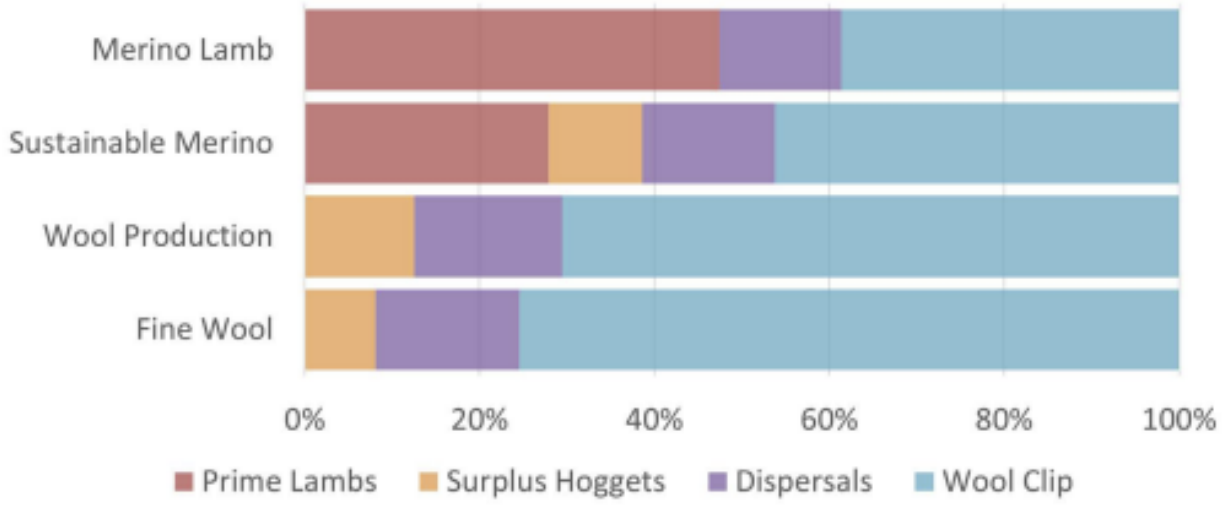

3. Look through your shortlist of rams to find the ones that meet your structural and type requirements.

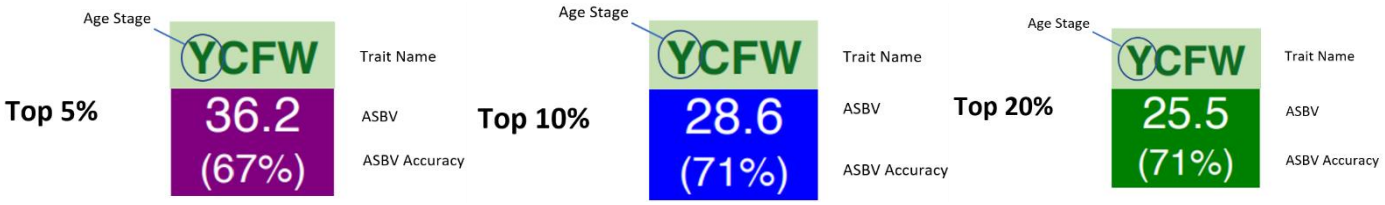

To assist in benchmarking sale rams relative to the current year drop of animals in the Sheep Genetics database, use the percentile band tables, which are found on the Sheep Genetics website: search.sheepgenetics.org.au/search/dashboard. The animals in the top tenth percentile rank the highest on the index, and those in the ninetieth percentile rank the lowest.

A brief overview of each of the indexes is included below. If you would like further information on how these selection indexes are generated, please refer to MERINOSELECT Indexes (Breeder) at sheepgenetics.org.au/Getting-started/ ASBVs-and-Indexes

Summary of MERINOSELECT Indexes

Sheep GENETICS

MEAT & LIVESTOCK AUSTRALIA

Understanding MERINOSELECT ASBVs

- Australian Sheep Breeding Values (ASBVs) allow you to compare the genetic differences between rams.
- Rams contribute half of a lamb's genetics. Rams have the largest impact on genetic progress, as they have more progeny throughout their lifetime.
- ASBVs are based around 0. It is important to compare ASBVs against current industry percentiles, which can be found on the Sheep Genetics website.
- ASBVs are reported with an accuracy figure. The higher the accuracy, the more information there is contributing to the ASBV, and the closer it is to the true breeding value of the animal.
- ASBVs are reported with an age stage, shown as a letter at the beginning of a trait e.g. weaning weight is WWT.
- Indexes combine traits into a single ranking value to describe an animal's suitability for a given production system.

How to interpret ASBVs

A selection index is an important tool to drive genetic improvement when there are a range of traits of economic or functional importance. Rams with higher indexes will produce lambs that are more suited to a particular production system.

Rams with lower fibre diameter (FD) ASBVs will produce progeny that have finer wool. A ram that has an ASBV of –2.0µm will produce progeny that are 0.5 microns finer than a ram with an ASBV of –1.0µm.

Rams with a more positive ASBV for weight (WT) will produce lambs that grow faster and therefore reach target weights in a shorter period of time.

Rams with a positive ASBV for fat (FAT) will produce lambs that are fatter, at the same weight. This ram will produce lambs that are on average 0.5mm fatter at the GR site when compared with an ASBV of 0mm.

Rams with a higher weaning rate (WR) will produce daughters who wean more lambs per ewe joined. A ram with a WR of 0.2 will produce daughters who wean 0.05 more lambs per ewe joined than a ram with an ASBV of 0.1.

INDEX	WT (kg)	EMD (mm)	FAT (mm)	CFW (%)	FD (µm)	WR	EBWR	WEC (%)
199.46	9.5	1	1	24	-2.0	0.2	-1.0	-40
ACC. 56	*ACC. 70*	*ACC. 65*	*ACC. 63*	*ACC. 69*	*ACC. 70*	*ACC. 55*	*ACC. 70*	*ACC. 60*

Rams with a more positive ASBV for eye muscle depth (EMD) produce lambs that have more muscle. A ram with an ASBV of 1mm will breed lambs with 0.5mm more eye muscle than a ram with an ASBV of 0mm.

Rams with a more negative ASBV for early breech wrinkle (EBWR) will produce lambs that have a plainer breech, therefore a lower ASBV tends to be more desirable. A ram with an EBWR of –1 will produce lambs that are 0.5 score plainer than a ram with an ASBV of 0.

Rams with a higher clean fleece weight (CFW) will produce progeny that cut more wool. A ram with an ASBV of 24% will produce progeny that cut 4% more wool than the progeny of a ram with an ASBV of 16%.

Rams with a more negative worm egg count (WEC) ASBV will produce progeny that are more resistant to worm burdens. A ram with a WEC ASBV of –40% will produce progeny that have 10% less worms compared to a ram with an ASBV of –20%.

2025 Deep Dene Poll Merino Top Price Ram

The Sugars Family secured the top priced ram in our 2025 On Property Ram Sale for $2,800. Lot 16 (240092), Pictured below, had very handy figures with ASBV's for yearling and adult CFW, YFD and YWEC in the top 20%. Index's for Sustainable Merino (SM), Wool Production (WP) and Fine Wool (FW) all sitting in the top 5%. He was positive for fat and EMD with a good size frame. Karla and Andrew picking him out early and spending up for their on-farm breeding program.

2025 Deep Dene Top Spender and Bulk Buyer

Manor Estate Manager Tim Salmon was our biggest spender on the day for their commercial enterprises, spending just over $13,000, to a top of $2,400. This company run farm enterprise may be run from investors on the mainland, but they are committed to buying their products and services from Island Producers. Manor Estate bought genetics from Deep Dene two years running now, selectively buying for productive low FD plain bodied animals that suit their medium to high rainfall farms across Kangaroo Island.

THANK YOU FOR SUPPORTING DEEP DENE POLL

Thank you for taking the time to look through our 2026 Deep Dene Poll Merino Ram Sale catalogue. We look forward to welcoming you on sale day and helping you select rams that will add soundness, wool cut, fertility and profit to your flock.

Sale Day Quick Reference

Sale date	**Thursday 15th October 2026**
Inspection	From 12.00pm
Sale time	2.00pm
Location	303 West Road, MacGillivray, Kangaroo Island SA 5223
Agent	Nutrien Ag Solutions – Kingscote Branch
Contacts	Sabrina Andrews 0428 920 834 | Paul Bott 0418 358 370
Phone bidding	Phone bidding accepted and can be organised through Nutrien Ag, AWN or Elders stock agents.
Logistics	Rams purchased on the day can be loaded into your stock crate after the sale. Delivery of ram teams can be arranged.

Buyer Checklist

- Inspect rams and mark preferred lot numbers before the sale.
- Speak with the Deep Dene team or selling agents about your breeding objectives.
- Organise phone bidding before sale day if you cannot attend in person.
- Confirm transport, loading or delivery arrangements after purchase.
- Complete an exit drench on arrival to your property, as recommended.
